

CAPABILITY STATEMENT

B&B Tree Management, LLC offers a variety of tree management services serving our local community in east Tennessee and surrounding states. Our lead tree specialist has been in the industry since 1997 and accompanied by our qualified team including certified arborists and commercial pesticide applicators. We take pride in what we do displayed through our reliability and operation standards. Fully licensed and insured.

CORE COMPETENCIES

- **Tree Trimming & Pruning** - Trim trees for overhanging limbs and weak union attachments to eliminate threats. Thin dead or decaying limbs to promote tree health and improve aesthetics. Thin out multi-stem leaders using proper lateral cuts to promote proper tree structure and stability. Prune lower branches using proper lateral cuts. All trimming and pruning are consistent with ANSI Best Management Practices.
- **Tree Removal** - Removal of dead, dying, or diseased trees, including those that are a danger to structures. Removal of danger trees identified by certified arborists as structurally unsound. **Emergency and hazardous removal services available 24/7.**
- **Fungicide, Herbicide, & Pesticide Application** - Preventative and correctional chemical applications to control weed and insect populations in urban and rural landscapes. Fungicides applied to fight against several types of fungus found in root rot.
- **Tree & Plant Health** - Identify and diagnosis common types of disease found in the native landscape. Soil analysis tests to identify mineral deficiencies, pH, and soil profile. Perform Tree Risk Management assessments.
- **Bracing, Cabling, & Lightning Protection** - Perform tree assessments to find potential danger trees that would benefit from bracing, cabling, or lightning protection. These trees typically have historical significance, are high-value trees, or would endanger property and/or public in the event of failure. Installation of systems varies due to species and location. Work is performed by a professional tree care specialist.
- **Powerline, Gas line, Right of Way, & Vegetation Management** - Use proper equipment and procedures to clear areas. Eliminate safety risks and hazards. Maintain appearance, promote proper drainage, and prevent erosion.

COMPANY SNAPSHOT

- UEI: P1CEGWSWGLC4
- CAGE CODE: 7S1E8
- DUNS # 080494072
- Veteran owned and operated, 25+ years of industry experience
- POC: Stephen Breeden or Megan Anderson
- POC Email: steve@seviertree.com or megan@seviertree.com
- Phone: 865-366-7313
- Address: 501 Parkway Sevierville, TN 37862
- Work Area: South East, USA
- SDVOSB

DIFFERENTIATORS:

- Veteran owned and operated
- 25+ years of industry experience
- Certified Arborist
- Member of International Society of Arboriculture (ISA)
- Continued industry specific training and safety education
- Drug free workplace.
